

CARLO SCIMECA

Environmental Engineer (B.Sc.)

PROFILE

Environmental engineering graduate from the University of Palermo, now pursuing a Master's Degree in Industrial Environmental Sustainability at Politecnico di Torino, on a twin-track path toward specialisation in Chemical Engineering. Strong background in environmental analysis, industrial process sustainability, and environmental impact assessment, with hands-on experience in GIS systems, CAD software, Excel, MATLAB and LaTeX. Seeking professional or internship opportunities in the chemical-industrial, energy, environmental consulting and HSE sectors.

EDUCATION

Master's Degree in Industrial Environmental Sustainability — in progress

Politecnico di Torino · Twin-track path toward specialisation in Chemical Engineering

Bachelor's Degree in Environmental Engineering — Grade: 105/110

University of Palermo · August 2021 – March 2025

Scientific High School Diploma — Grade: 88/100

G. D'Alessandro Institute · September 2016 – July 2021

WORK EXPERIENCE

Student Assistant — Politecnico di Torino

September 2026 – January 2027

- Contributed to the setup and curation of exhibitions showcasing student projects, providing logistic and technical support to the DIATI Mineralogical Museum.
- Supported centralised and departmental library and video-library services, managing document distribution, collection organisation and archive maintenance.

Technical Assistant — SE.I.CO. S.r.l.

March 2025 – September 2025

- Drafted technical reports and floor plans for building renovation projects, including 3D modelling of infrastructure works.
- Used CAD and GIS software for technical design and land-use planning.
- Supported preparation of technical opinions, building permit applications and tender documentation.
- Drafted Site Safety Operational Plans (POS) and managed technical and organisational aspects of the construction site.

Administrative Assistant — R&T

May 2022 – February 2025

- Managed and archived accounting documents, ensuring data traceability and security.
- Coordinated internal procedures and prepared logistics and administrative documentation.
- Liaised with companies, public bodies and credit institutions; handled telephone customer support.
- Streamlined internal procedures, improving overall office efficiency.

SPECIALIST TECHNICAL SKILLS

- Microsoft Office Suite: advanced proficiency in Excel, PowerPoint and Word for data analysis, technical reporting and presentations.
- Numerical Analysis & Design: modelling with MATLAB, CAD software and open-source applications.
- Environmental Monitoring & Analysis: pollution prevention, data analysis and water resource management.
- GIS & Spatial Analysis: ArcGIS, QGIS, ENVI, GeoDa — geostatistical analysis, spatial data processing and geospatial modelling.
- Geotechnics & Hydrology: soil characterisation, geotechnical analysis and hydrological modelling.
- Remote Sensing & Photogrammetry: satellite image processing (ESA SNAP) and 3D photogrammetric modelling (Agisoft MetaShape).
- AI Tools: advanced use of generative AI for technical documentation, data analysis and coding support.
